### Course Summary

---

This course offers you a broad introduction to software engineering. You will be able to demonstrate a sound knowledge of the foundational concepts of computer networks, including hands-on practical experience. You will be able to communicate accurately and appropriately and will have the qualities needed for employment that require some degree of personal responsibility. In addition to the technical skills and knowledge, you will also gain a range of transferable skills to ensure effective team working, take independent initiative, solve problems and have an adaptable and flexible approach to network engineering, showing resilience under pressure, and meet challenging targets within a given resource. The course will prepare you for a range of careers in software engineering, data analytics, security, intelligent systems, applications development and testing.

There will also be an opportunity to achieve a vendor accredited certifications. A programme of events has been developed where experts from industry or visiting academics in the subject area will present to the students. The School of Computing runs a series of 'Tech Talks' where industry specialists have visited the College to speak with students, local employers and College stakeholders. The School of Computing also holds an annual Student Conference. This features talks from alumni who are now working successfully in industry.

# What You Will Learn

---

## Modules

---

### Level 4

- Programming
- Networking
- Professional Practice
- Database Design and Development
- Security
- Planning a Computing Project (Pearson set)
- Software Development Lifecycles
- Website Design and Development

### Level 5

- Computing Research Project
- Business Process Support
- Data Structures and Algorithms
- Applied Programming and Design Principles
- User Experience and Interface Design
- Database Management Systems

## Entry Requirements

---

48 UCAS tariff points with a minimum of three GCSEs at Grade C/4 or above and including Mathematics and English. Applicants who do not meet the criteria for Mathematics and English will be considered and will be invited for interview where they will sit a numeracy and literacy skills assessment. The School of Computing welcomes applications from candidates who do not meet the above criteria. Where this is the case, applicants will be invited for interview at which they will be expected to provide a portfolio (either physical or digital) that: Demonstrates industry experience or a relevant venter qualification in a Computing discipline;

OR

Provides examples of computer skills appropriate to Level 4/5 study. Examples could

include:

- Network administration and automation
- Website development
- Database design
- Programming skills
- Network security
- Data security

Candidates will also be required to undertake literacy and numeracy skills assessment along with a Computing aptitude test.
