Course Summary

If you want a career in IT, IT solutions or data analysis, this course is ideal.

You will develop all the skills of a data technician in this industry and a nine-week work placement is an essential part of this course.

What You Will Learn

You will develop an understanding of:

- Digital, virtual and cloud environments
- Planning digital projects
- Implications of digital technology
- Legal and regulatory obligations
- Privacy and confidentiality
- Testing software, hardware and data
- Using data in software design
- Using digital to analyse and solve problems

Entry Requirements

5 GCSEs including maths and English Language at grade 5.

Work Experience

The 45 day industry placement allows you to develop your occupational specialism skills as well as those necessary to working in any environment, such as effective planning, working with others, health and safety and promoting equality and diversity.

Progression

Successful completion of this course can lead to employment, apprenticeships or higher education. Careers include:

- Data analyst
- Data statistician
- Market research data analyst
